

AGHASI KHACHATRYAN

Senior Backend Engineer | AI-Assisted SDLC & Team Enablement | Java & Go
Yerevan, Armenia | UTC+4 | +374 94 657895 | aghasikhachatryan04@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Senior Backend Engineer with 6+ years of experience building Java and Go systems for financial data, banking and e-commerce. Built an agentic SDLC workflow now used by the team in daily development, implemented as a Claude Code plugin connecting Jira planning, test-first implementation, verification and review through reusable skills, subagents, MCP integrations and human approval gates. Led adoption of Claude Code and OpenCode CLI for refactoring, test generation and documentation, with human review as the final quality gate. Combines distributed systems, cloud delivery and production ownership with technical mentoring and AI-assisted engineering practices.

AI DEVELOPMENT & TEAM ENABLEMENT

- Built and published tickwrite-sdlc, an internal Claude Code plugin used by the team in daily development and distributed through GitLab: five skills (/brainstorm, /ticket, /tdd, /verify, /review), eight specialized subagents, hooks, a PowerShell state CLI, templates and onboarding documentation.
- Implemented ticket-scoped PreToolUse checks for human plan approval, approved-service boundaries, generated-source protection and captured failing-test evidence before production-code edits. Uses fresh-agent review and local end-to-end verification, with human review as the final gate.
- Maintains workspace and per-service CLAUDE.md / AGENTS.md for an 11-service Micronaut platform: architecture, conventions, API-first rules, build/test commands and cross-service pitfalls.
- Integrated Jira/Confluence through Atlassian MCP, codebase-memory MCP for impact analysis and context7 MCP for library documentation. Verification uses Docker Compose, local Postgres data and Git-backed Postman collections.

AI CREDENTIALS & PROFESSIONAL DEVELOPMENT

OpenAI | Issued Oct 2026; expires Oct 2027

OpenAI Technical Practitioner; Codex Solutions Practitioner

Codex Deployment Practitioner; ChatGPT Solutions Practitioner

ChatGPT Deployment Practitioner; OpenAI Consultative Solutions Practitioner

OpenAI Cyber Solutions Practitioner; OpenAI Cyber Deployment Practitioner

Google | Certified Partner Specialist Gemini Enterprise Deployment - issued Sep 2026; expires Mar 2027.

Add Agents to Gemini Enterprise - issued Sep 2026.

In progress: Preparing for an Anthropic certification.

CORE SKILLS

AI engineering: Claude Code plugins, skills, subagents and hooks; OpenCode CLI; MCP integrations; CLAUDE.md / AGENTS.md; agentic SDLC, AI-assisted TDD and review, Anthropic API integration.

Backend & architecture: Java 8/11/17/21, Go, SQL, Python automation; Spring Boot, Security, Cloud and Data; Micronaut, Hibernate/JPA, Apache Camel, Uber FX; microservices, REST, gRPC, OpenAPI, reactive systems, concurrency, SOLID and Clean Architecture.

Data & messaging: PostgreSQL, MySQL, Oracle, H2, MongoDB, Redis, Elasticsearch; indexing and query tuning; Flyway, Liquibase, R2DBC, JDBC, MyBatis; Kafka, ActiveMQ, AWS SQS, WebSockets and SSE.

Cloud & delivery: AWS EKS/EC2/S3/SQS/IAM/SSO; Docker, Kubernetes, Helm; GitHub Actions, GitLab CI/CD; Nginx, Cloudflare, Linux and Maven.

Quality & security: JUnit 5, Mockito, AssertJ, integration and end-to-end testing; p95/p99 latency profiling, Grafana and structured logging; OAuth2, JWT, RBAC, Keycloak and PASETO.

PROFESSIONAL EXPERIENCE

OMD - Tick Data | Sep 2024 - Present

Senior Java Software Engineer

Market-data platform for historical data, tick-level processing and quantitative research.

- Built and shared the team's agentic SDLC plugin, agent instructions and MCP integrations, now used in daily development. Led adoption of Claude Code and OpenCode CLI for refactoring, test generation and documentation, retaining human review as the final quality gate.
- Architected reactive Java 21 / Micronaut microservices with GraalVM native builds, Micronaut Data, R2DBC and JDBC for tick-level market-data processing.
- Owns a Go module using goroutines, worker pools and synchronization primitives for high-throughput concurrent processing.
- Designed REST APIs, streaming downloads, asynchronous messaging and real-time channels. Built a custom API gateway, configuration service with dynamic reload and data-migration services.
- Standardized contract-first OpenAPI and code generation; authored reusable validation and exception-handling libraries used by every service team.
- Secured APIs with authentication, authorization, JWT lifecycle and RBAC. Added logging and Grafana metrics; tuned queries and slow paths using p95/p99 latency.
- Drives system-design decisions, mentors engineers through review, supports legacy versions and maintains unit, integration and end-to-end coverage.

Technologies: Java 21, Go, Micronaut, GraalVM, PostgreSQL, MySQL, H2, Flyway, ActiveMQ, AWS, Docker, Kubernetes, Helm, GitLab CI/CD, JUnit, Grafana

PROFESSIONAL EXPERIENCE (CONTINUED)

Energize Global Services | Jul 2023 - Jul 2024

Senior Java Software Engineer

PGUI bank-management system.

- Delivered features and resolved production incidents; designed REST APIs, user-management and search functionality with Keycloak identity and access management.
- Tuned SQL queries and maintained schema integrity through versioned Liquibase migrations.

Technologies: Java 11, Spring Boot, Tapestry, Keycloak, Apache Camel, Oracle, Hibernate, Liquibase, Maven

I-Tech | Aug 2022 - Jul 2023

Java Backend Developer

Audit Trail, T3 TMS, TMT GPS tracking and Click Market B2C e-commerce.

- Delivered four production backend products as sole or lead developer using Spring Boot and Spring Cloud; implemented REST APIs, JWT security, search and notifications.
- Built a Kafka-driven audit service using Elasticsearch and MongoDB, tracking p95/p99 query latency as the index grew.
- Delivered Click Market as sole developer, including payments, catalog, cart, checkout, administration and inventory.
- Built S3 uploads and SSE streaming; owned database migrations, multi-module architecture, CI/CD, Docker packaging, code review and automated tests.

Technologies: Java 17/11, Spring Boot 3, Spring Security/Cloud/Data, Kafka, Elasticsearch, MongoDB, MySQL, PostgreSQL, Docker, Kubernetes, AWS S3, Liquibase

Codeex | Aug 2020 - Aug 2022

Java Software Engineer

MLM e-commerce platform.

- Migrated a monolith to microservices and built white-label-capable products. Developed a PASETO authorization server and designed user-management database architecture.
- Led code reviews and architecture decisions across the team.

Technologies: Java 17, Spring Boot/Security/Cloud, PostgreSQL, Redis, WebSockets, Hibernate, MyBatis, Liquibase, Docker

Smart Code | Jul 2023 - Sep 2024

Java Trainer (Part-time)

- Trained aspiring developers in Java, Spring and backend engineering; authored exercises and materials covering OOP, data structures, algorithms and clean code.

PicsArt Armenia | Feb 2020 - Aug 2020

Java Developer Trainee

- Completed intensive Java backend training and contributed to production development under senior mentorship.

SELECTED AI PRODUCT PROJECT

SoulsHub (Freelance) | Jan 2024

Architecture & DevOps Engineer

LLM-powered platform for conversations with AI representations of personalities, historical figures and mentors.

- Designed application and database architecture; configured Nginx and Cloudflare for routing, TLS and edge protection.
- Built GitHub Actions CI/CD with builds, quality gates, approval steps and Docker deployments to staging and production.
- Provisioned and hardened AWS EC2 with security groups and IAM roles; automated S3 database backups and version-based rollback.

Technologies: GitHub Actions, GitHub Container Registry, Docker, AWS EC2/S3/IAM, Nginx, Cloudflare, Linux

ADDITIONAL CERTIFICATIONS & TRAINING

AWS Cloud Practitioner Essentials - Amazon Web Services, Feb 2023

Credential ID: 1CD4437E-4111-40EB-A4E1-54105F6F3C6F

AWS Cloud Essentials - Amazon Web Services, Feb 2023

Credential ID: 189192CE-ADCC-406C-BC2A-8EEBB954F784

Java Development - Basic IT Center, Sep 2020 | Java Backend Trainee Program - PicsArt Armenia, 2020

Java & Spring Backend Curriculum - Smart Code, 2023-2024; authored and taught as instructor.

EDUCATION & LANGUAGES

BSc, Informatics and Computer Science | 2014 - 2018

National University of Architecture and Construction of Armenia (NUACA)

English: B2, professional working proficiency | Russian: fluent | Armenian: native
